OVERVIEW

Astro Attack™

COPYRIGHT © 1982 JIM HAGA

This is an action game! You control a rocket ship: ordering it to climb, dive, change direction, fire salvos and drop bombs. As you scan the landscape below, you will spot targets for your neutrostatic bombs. But if you miss, the defenders fight back with their deadly laser cannon. In the air you are confronted by fighters, mother ships, and "smart bombs" that track your ship, demanding your best evasive maneuvers. If all that is not enough, you can increase the "difficulty" level so Astro Attack is always a challenge.
